December 2017

Message from the Executive Director

The Canadian Association of Schools of Nursing (CASN) is pleased to present Registered Nurses Education in Canada Statistics, 2015–2016 — Registered Nurse Workforce, Canadian Production: Potential New Supply.

This annual report supports health human resources planning in both the nursing service and nursing education sectors. It represents the fruit of a strong partnership among national and provincial/territorial bodies and effective collaborative relationships with multiple stakeholders.

The report provides data and statistical analysis of

- the number of pre-licensure graduates eligible to apply for initial licensure/registration and enter the registered nurse (RN) workforce;
- the number of RNs obtaining graduate qualifications;
- the number of nurse practitioner (NP) graduates;
- innovations in nursing education program access and delivery;
- the composition of faculty delivering nursing education; and
- faculty retention and recruitment.

We extend our sincere thanks to the contributing faculty and staff of the schools of nursing for their effort, commitment, and collaboration. Without their annual support, this collection could not exist. We would also like to thank CASN members and the College of Nurses of Ontario who contributed to question testing, and the *Ordre des infirmières et infirmiers du Québec* who provide additional data for Québec.

We look forward to hearing your comments about the report.

Yours sincerely,

Cynthia Baker, RN, PhD
Executive Director
Canadian Association of Schools of Nursing

ENDNOTES	62

Introduction

The *Registered Nurses Education in Canada Statistics* report is a product of the *National Student and Faculty Survey of Canadian Schools of Nursing* (NSFS), and it is the only longitudinal national collection of nursing education data in Canada. The report includes entry-to-practice education programs for registered nurses, as well as master's and doctoral nursing programs and programs for nurse practitioners (NP). Data has been collected on RN students and faculty since 1963. Stakeholders are consulted annually regarding improvements and the continued applicability of selected survey questions.

National Student and Faculty Survey of Canadian Schools of Nursing (NSFS)

Stakeholders	Role
Canadian Association of Schools of Nursing (CASN)	Survey program lead
	Registered nursing education lead (includes nurse practitioner education)

The *Registered Nurses Education in Canada Statistics* report of the NSFS focuses on two main elements: programs and faculty. Program elements provide data about the number of students admitted, enrolled, and graduating from nursing programs, the types of programs offered, and the approaches to program delivery. Faculty elements include numbers of faculty, types of faculty, their employment status, level of education attained and in progress, age cohort, and information on recruitment and retirement.

This publication provides an analytical report of the 2015–2016 data collected from the registered nurse (RN) and nurse practitioner portions of the NSFS. The key program findings are presented for 2015–2016, followed by the key RN faculty findings for 2016. The detailed 2015–2016 results are then presented. The results include data from the survey as well as data obtained from the *Ordre des infirmières et infirmiers du Québec* (OIIQ), added to offset survey under-reporting of admission and graduate data for Quebec's entry-to-practice diploma programs. The inclusion of the OIIQ data, in combination with the results of the NSFS, permits a pan-Canadian analysis.

Note: In order to ensure clarity the OIIQ data is used for both the admissions and graduate data points for entry to practice in all sections of this report.

Previously, the use of OIIQ data was limited to the section “Key Program Findings.”

Survey Distribution and Response

The 2015–2016 NSFS survey was issued to all 137 schools of nursing in Canada offering entry-to-practice (ETP) pre-licensure education entitling successful graduates to apply for initial licensure/registration as an RN, and/or post-RN baccalaureate programs for nurses, NP, and/or graduate RN education.

Of the 137 schools, 117 schools completed the survey, including 92 of a possible 94 CASN members. Of the 117 schools, 24 were CÉGEPs. The overall survey response rate was 85.4%; the CASN member response rate was 97.9%. See the tables starting on page 22 for more detailed information about omitted or unusable data. On average, 80.6% of schools responded to the faculty questions.

Data Comparison Timeframes

Program inventory, admission, and enrolment data were collected for the 2015–2016 academic year. Unless otherwise stated, increases or decreases noted in the report are in relation to 2014–2015 data.

Graduate data were collected for calendar year 2016. Unless otherwise stated, increases or decreased noted in the 2016 data are in relation to the 2015 survey data.

Faculty data were also collected for calendar year 2016. Unless otherwise stated, comparisons of faculty data with previous results are in relation to 2015 data.

Survey Methodology

See the Appendix for methodological information.

2015–2016 Key Program Findings

This section of the report highlights key findings regarding education programs in 2015–2016. It reveals trends related to the numbers of new graduates being prepared to enter the workforce as well as the modalities and educational level of the program they are taking across the country.

Entry-to-Practice Programs

Entry-to-practice (ETP) programs entitle the successful graduate to apply or initial licensure/ registration as an RN.

- 115 of the 117 schools (98.3%) offered an ETP program.
- 89 of the 117 schools (76.1%) offered ETP baccalaureate programs.
- ETP baccalaureate programs were offered in every province and territory, except for the Yukon, where no registered nurse education programs exist.
- 41 colleges partnered with a university to deliver ETP baccalaureate programs; three colleges in British Columbia and 1 college in Manitoba granted ETP baccalaureate degrees autonomously.

Program inventory and admissions are 2015–2016 data as compared with 2014–2015 data.

ETP Admissions

- 16,244 students entered ETP programs in 2015–2016, an increase of 0.1% (from 16,230) (Figure A).

Figure A: Admissions to Entry-to-Practice Programs, 1999–2000 to 2015–2016

(Collection period changed from calendar year to academic year in 2001)

Sources: National Student and Faculty Survey of Canadian Schools of Nursing; Ordre des infirmières et infirmiers du Québec

ETP Graduates

- By and large, the number of graduates has risen steadily between 2000 and 2016. However, the number of graduates decreased slightly in 2016 to 12,484, a 0.8% decrease compared with 2015 (12,579).
- The number of ETP graduates surpassed 10,000 for the seventh year in a row (Figure B).

Graduate data are 2016 data as compared with 2015 data.

Figure B: Graduates from Entry-to-Practice Programs, 1963-2016

Sources: *National Student and Faculty Survey of Canadian Schools of Nursing*; *Ordre des infirmières et infirmiers du Québec*

Note: The 2014–2015 figure has been revised based on corrections provided by the schools, resulting in a change from 12,549 to 12,579.

.. Figure not available

... Figure not appropriate or not applicable

Note: Data for 2015 for Alberta have been revised based on corrected data provided by schools (1,711 to 1,741).

Post-RN Programs

- 17.9% of schools (21 of 117 schools) offered one or more post-RN baccalaureate programs for diploma-trained nurses wishing to obtain a baccalaureate degree in nursing or nursing science.
- Post-RN programs were not reported by Prince Edward Island, Saskatchewan, the Northwest Territories, Nunavut, and the Yukon.
- 1,777 diploma-trained RNs graduated from post-RN baccalaureate programs in 2016, representing a 2.6% increase from last year (Figure C).

Program inventory data are 2015–2016 data as compared with 2014–2015 data.

Graduate data are 2016 data as compared with 2015 data.

Figure C: Graduates from Post-RN Baccalaureate Programs, 2005–2016

Source: *National Student and Faculty Survey of Canadian Schools of Nursing*

Master's and Doctoral Programs

Admissions to doctoral programs have remained fairly stable in the last five years.

- 28.2% of schools (33 of 117 schools) offered one or more master's programs; master's programs were not available in the Northwest Territories, Nunavut, or the Yukon.
- 14.5% of schools (17 of 117 schools) offered doctoral programs in 2015–2016.
- 1,037 students were admitted to master's programs, an increase of 3.4% since 2014–2015 (Figure D).
- 678 RNs graduated from master's programs, a 1.0% decrease from the previous year (Figure E).
- Admissions to doctoral programs increased by 13.7% from the previous year (Figure D).
- Total number of graduates from doctoral programs was 60 graduates in 2016 as compared with 66 in 2015, a decrease of 9.5% (Figure E).

Source: *National Student and Faculty Survey of Canadian Schools of Nursing*

Figure E: Graduates from Master's and Doctoral Programs, 2012 to 2016

Number of Graduates

Source: *National Student and Faculty Survey of Canadian Schools of Nursing*

Nurse Practitioner Programs

Nurse practitioner (NP) programs are offered at three educational levels: post-RN, master's, and post-master's.

- 23.0% of schools (28 of 117 schools) offered one or more NP programs.
- NP programs were reported in all provinces and territories, except for the Northwest Territories, Nunavut, and the Yukon.
- The number of students admitted to NP programs decreased in 2015–2016. It decreased 9.3% in 2015–2016 over 2014–2015, with 699 students entering a variety of NP programs (Figure F).
- Graduate levels for NP programs decreased by 5.8% in 2016 compared to 2015: 520 graduates in 2016 as compared with 551 in 2015. (Figure G).

Approaches to Program Delivery

Fast-Track ETP Programs

Fast-track ETP programs allow students to complete an entry-to-practice baccalaureate degree in less than four years. These programs achieve this by offering courses throughout the spring and summer months and by admitting students who have already completed some of the program requirements, typically some of the foundational non-nursing course requirements. A variety of fast-track ETP programs are being offered, including those identified as *accelerated*, *fast-track*, *compressed*, *second-degree entry*, *advanced entry*, and *bridging* programs. The number of fast-track ETP programs continues to grow.

Note: The usual ETP baccalaureate program duration of four years may not be the standard program length for all ETP baccalaureate programs in Quebec. As a result, Quebec ETP programs are not counted as fast-tracked unless the school identifies the program as such.

- 36.8% of schools (43 of 117 schools) offered one or more ETP fast-track programs (Table B).
- Many of the 43 schools offered multiple fast-track program options (Table C).

Program inventory data are 2015–2016 data as compared with 2014–2015 data.

Distance Education Options

For the purposes of this report, distance education (DE) is used to describe programs offered wholly electronically or in a blended model that incorporates online and face-to-face delivery.

- 55.6% of all programs (108 of 194 programs) used some form of DE (Table D).
- Some DE delivery is used in 96.4% of all nurse practitioner programs and in 61.8% of master's programs. Of Canada's 17 doctoral programs, 35.3% utilize some DE options.

Table D: Number and Types of Programs Utilizing some Distance Education by Jurisdiction, 2015–2016

2016 Key RN Faculty Findings

The supply of RN faculty is a major factor affecting the capacity of programs to educate nurses.ⁱ It is influenced by retirement of existing faculty, the inflow of newly prepared faculty, and variables such as the ability to attract and retain qualified faculty.ⁱⁱ

RN or nursing faculty encompasses different types of nursing educators. For the purposes of this report:

- “Permanent faculty” refers to tenured/tenurable faculty who teach nursing courses in a university and permanent full-time or permanent part-time faculty who teach nursing courses in a college.
- “Full-time faculty” refers to full-time permanent faculty who teach nursing courses plus full-time contract faculty (these are faculty who hold contracts of one academic year or longer) who teach nursing courses.
- “Contract faculty” refers to full-time contract faculty (these are faculty who hold contracts of one academic year or longer) who teach nursing courses plus part-time contract faculty (these are faculty who hold contracts of less than one academic year) who teach nursing courses.
- Clinical faculty are not included in faculty counts.
- “RN faculty” and “faculty” refer to all of the above.

RN Faculty Demographics

- 13,894 RN faculty members were employed by schools of nursing in 2016.
- Only 19.3% of faculty members are permanent: 2,680 of the 13,894 RN faculty (Table E).
- 57.1% of permanent faculty were 50 years of age or older; 39.3% of permanent faculty were 55 years or older (Table F) and 21.9% were 60 years or over.
- The RN faculty are older than the general RN workforce with the percentage of RN permanent faculty in the 50+ age cohort more than 10 percentage points higher than the percentage of 50+ in the RN workforceⁱⁱⁱ (Table F).
- An increasing percentage of RN permanent faculty were in the 50+ age cohort with the greatest percentage change in the 60+ age cohort (Table G).

Faculty data are 2016 data as compared with 2015 data.

The response rate for the question about age cohorts was 77.9% (74 of 95 schools). The response rate for the questions about employment status was 79.6% (109 of 137 schools).

Table E: Number of Faculty by Employment Status, 2016

Faculty Category	Number of Faculty	% of Faculty Workforce
Permanent Faculty: permanent, full-time faculty	2,680*	19.3
Contract Full-Time Faculty: faculty fulfilling contracts of one academic year or longer	2,143*	15.4
Contract Part-Time Faculty: faculty fulfilling contracts of less than one academic year	9,071	65.3
Total Faculty Workforce:	13,894	100

Source: *National Student and Faculty Survey of Canadian Schools of Nursing*;

*See tables 10 and 14 (p. 41 and p. 45 respectively)

Table F: Age Category Percentages for 2016 RN Workforce compared to 2016 RN Permanent Faculty

Age Category	% of RN Workforce, 2016	% of RN Permanent Faculty, 2016
<35	27.3	5.6
35-39	11.4	10.1
40-44	11.3	11.9
45-49	11.9	15.4
50-54	13.1	17.8
55+	25.0	39.3

RN Faculty Recruitment and Retirement

- The data collected on questions concerning faculty recruitment and retirement have implications for future faculty supply, particularly when examined in relation to the numbers of current enrolments in graduate programs. They indicate an imminent shortage of qualified faculty if current entry-to-practice enrolments are maintained.
- 83 permanent RN faculty (senior faculty) retired in 2016.
- 16.9% (14 of the 83) were under 60.
- 21.9% of permanent RN faculty aged 60 or more (Table G) were eligible to retire.
- Schools were unable to fill 57 full-time positions, representing a 2.1% vacancy rate. See Table E for full-time faculty count.
- Schools projected a need to hire 118 full-time faculty in 2017 (Table H).

Table H: Full-Time RN Faculty Hiring Projections, 2017

	Canada	NL	PE	NS	NB	QC	ON	MB	SK	AB	BC	NT	NU	YT
Full-Time Permanent Faculty, # of Hires Projected	137	5	2	3	3	17	27	15	9	26	18	12
Full-Time Contract Faculty, # of Hires Projected	118	0	0	8	3	13	11	20	4	52	5	2

Source: *National Student and Faculty Survey of Canadian Schools of Nursing*

... Figure not appropriate or not applicable

The response rate for the question about recruitment projections of full-time faculty was 83.2% (79 schools).

The response rate for the question about actual retirement of permanent faculty was 83.2% (79 schools).

Full-Time RN Faculty Academic Upgrading

- 9.6% of permanent full-time RN faculty (256 permanent full-time faculty) were engaged in academic upgrading programs ranging from baccalaureate to post-doctoral studies. These studies took place in schools in and outside of Canada (Table I).
- The majority of faculty who were upgrading educational qualifications were enrolled in master's (36.0%) or doctoral programs (56.6%).

The response rate for the question about the number of full-time faculty engaged in academic upgrading was 83.2% (79 schools).

Table I: Full-Time Faculty Engaged in Academic Upgrading, 2016

	Full-Time Permanent		Full-Time Contract		Total
	In Canada	Outside Canada	In Canada	Outside Canada	
Canada Total	239	17	116	6	378
Baccalaureate degree in nursing	3	0	3	2	8
Baccalaureate degree in other discipline	2	0	0	0	2
Master's degree in nursing	66	0	51	1	118
Master's degree in other discipline	26	0	19	1	46
Doctoral degree in nursing	70	8	26	1	105
Doctoral degree in other discipline	59	8	12	1	80
NP other	2	0	0	0	2
NP post-master's	1	0	1	0	2
NP master's	2	0	2	0	4
Post-doctoral study in nursing	3	1	1	0	4
Post-doctoral study in other discipline	3	0	1	0	4
Other	2	0	0	0	2

Source: *National Student and Faculty Survey of Canadian Schools of Nursing*

Number of RN Faculty and Type of RN Faculty Contracts in Place

- Schools employed 13,894 faculty members (Table E).
- 19.3% of the faculty held full-time permanent positions (Table E).
- 15.4% of full-time faculty held full-time contracts of one academic year or longer (Table E).
- 65.3% of the faculty currently teaching in nursing programs were employed in a part-time contract capacity (Table E).

"Contract faculty" refers to full-time plus part-time contract faculty.

The response rate for the two questions concerning the number of full-time and part-time contracts in place was 79.6% (109 of 137 schools).

Number of RN Faculty on Leave

The survey question concerning faculty leave captures the number of permanent faculty on any school-approved leave of absence.^{iv} An approved leave includes, but is not restricted to, maternity/paternity leave, sick leave, compassionate leave and sabbatical leave.

- 6.8% of permanent faculty (183) were on leave (Table J).
- Prince Edward Island, Nova Scotia, New Brunswick, Manitoba, Saskatchewan, Alberta, British Columbia, and the Northwest Territories exceeded the Canada percentage of total faculty on leave.

The response rate for the question about number of permanent faculty on leave was 83.2% (79 schools).

Table J: Full-Time Permanent RN Faculty on Leave, 2016

	Canada	NL	PE	NS	NB	QC	ON	MB	SK	AB	BC	NT	NU	YT

Faculty Recruitment Factors

Schools were asked to identify factors that affect their ability to recruit full-time faculty. The data reveal many shared experiences across geographic location; when the data are broken down by region, however, similarities emerge in the factors reported in northern and rural areas.

Factors in Northern and Rural Areas

Schools in northern and rural areas reported that the biggest factors limiting their ability to recruit faculty were

- lack of nurse practitioner, master's, and doctorally prepared candidates;
- lower salaries and fewer benefits; and
- remote location and small community size.

Pan-Canadian Recruitment Factors

Schools across Canada identified similar factors as a challenge limiting their ability to recruit new faculty. The three main concerns are presented in Table K.

Table K: Recruitment Factors, 2016

Recruitment Factors	% of Respondents Reporting Factor
A shortage of nurse practitioner, master's, and doctorally prepared nurses seeking academic positions	53.6
Lower salaries and fewer benefits for master's and doctorally prepared faculty as compared with salaries available in practice settings	34.0
Budget cuts and lack of funding to create and sustain positions	30.4

Source: *National Student and Faculty Survey of Canadian Schools of Nursing*

The response rate for the question about issues affecting the recruitment of full-time faculty was 62.1% (59 responses).

Summary of Key Program and RN Faculty Findings

- The number of graduates from entry-to-practice programs decreased slightly in 2016 to 12,484, a 0.8% decrease compared with 2015 (12,579).
- Admissions increased in 2015–2016; 16,244 students entered ETP programs, an increase of 0.1% from 16,230 the previous year.
- 55.9% of all programs now use some distance education delivery, which may be improving student access.
- Increased graduate program admissions need to be sustained to avoid a potential faculty shortage as the following data indicate:
 - 39.3% of faculty were in the 55+ age cohort
 - 21.9% of faculty were in the 60+ age cohort.
 - Currently, there are 456 students enrolled in PhD nursing programs in Canada, 145 of which are current faculty members.
 - The potential future supply of new faculty from current PhD enrolment in Canada is therefore 311.
 - In 2015–2016, master's admission increased by 3.4% and doctoral admissions decreased by 13.7%. The number of master's graduates increased in 2015–2016; however, the number of doctoral graduates decreased.
 - The replacement pool (master's and doctoral graduates) for retiring faculty is inadequate if enrolments in graduate programs remain at current levels.

2015–2016 Results

The 2015–2016 survey was issued to the 137 schools of nursing offering entry-to-practice (ETP) pre-licensure education entitling successful graduates to apply for initial licensure/registration as an RN, or for post-RN, NP and graduate RN education. It was completed by 117 schools, including 92 of a possible 94 CASN members.

The overall survey response rate was 85.4%; the CASN member response rate was 97.9%. See the tables starting on page 22 for more detailed information about omitted or unusable data. On average, 80.6% of schools responded to the faculty questions.

Different collection periods and methodologies and under-reporting from a small proportion of schools may result in differences between the records of a provincial/territorial government or regulatory body and the data from the *National Student and Faculty Survey of Canadian Schools of Nursing*.

The following tables represent data as reported by each of the participating schools and do not include data from other sources. CASN is not responsible for errors in data reported by schools.

Note: In order to ensure clarity the OIIQ data is used for both the admissions and graduate data points for entry to practice in all sections of this report.

Previously the use of OIIQ data was limited to the section “Key Program Findings.”

It is important to read the notes that accompany each table as well as the section “Methodological Notes” on page 53, which contains information pertinent to all of the tables. The full survey methodology and definitions are in the Appendix.

Table 1: Education Programs by Province and Territory — Schools Offering Diploma, Undergraduate and Graduate Programs, 2015–2016, by Program Category

Baccalaureate collaborative partnerships are shown by indenting the name of the partner school under that of the degree-granting institution.

Notes

- OIIQ data 2015–2016: 4,323 students were admitted to diploma programs and 752 students to baccalaureate programs; 2,747 students graduated from diploma programs and 572 from baccalaureate programs. Enrolment data were not reported.
- As of 2013-2014, OIIQ data has been used for all Quebec admission and graduate numbers to ensure a complete and accurate picture.
- Enrolment numbers are supplied directly from the schools.
- Totals may not add up to 100 due to rounding.

Summary of omitted and unusable data:

Quebec

Diploma	19 schools' enrolment data
Baccalaureate	1 school's enrolment data
Post-RN Baccalaureate	1 school's enrolment data
Master's	1 school's enrolment data

Methodological Notes — Survey Tables

Classification of nursing programs

Programs are identified by a standard data code, which allows the RN education data to be attributed to one of six program categories.

Diploma	Diploma, Diploma Exit option, PN to RN, LPN to RN, and DEC
Baccalaureate:	Standard, Generic, Collaborative, Accelerated, Fast Track, Advanced, Second Degree Entry, Compressed, LPN to RN and RPN to RN
Post-RN:	Post-RN Baccalaureate, DEC-BACC
Master's:	Master's in Nursing, DESS
Doctoral:	Doctorate in Nursing
Nurse Practitioner:*	Nurse Practitioner, NP integrated with a degree program, (e.g., MN/NP)

*NP programs may be combined with or integrated into master's degree programs, and schools may or may not report separate data for these integrated programs. Where the data are reported separately it is recorded under the NP program.

Collection Period

Program inventory, admission, and enrolment data are collected on the academic year. This year's collection is for the 2015–2016 academic year.

Graduate and faculty data are collected on the calendar year. This year's collection captures these data for calendar year 2016.

Data Collection Terms

Admission: Admission results are calculated by totalling the number of first-time nursing students admitted to Year 1 of the program plus the number of advanced entrant students admitted in any year of the program.

Admission results include data for each intake offered throughout the course of an academic year.

Schools are asked to report admission results *after the allowed withdrawal date* of their institution.

Enrolment: Enrolment results are a count of the number of students enrolled in each year of study.

Enrolment results include data for each intake offered throughout the course of an academic year.

Schools are asked to report enrolment results *after the allowed withdrawal date* of their institution.

Entry-to-Practice

Programs: Entry-to-practice (RN-ETP) programs entitle the successful graduate to apply for licensure/registration. RN-ETP programs include diploma, generic baccalaureate and entry-to-practice master's.

Graduates: Graduate results are calculated by totalling the number of degrees awarded by each institution throughout a calendar year.

See the Appendix for a list of the definitions provided to all schools.

Data Limitations

Data included in the survey tables are as reported by the schools that responded to the survey. See "Survey Response" below for details on annual response rates.

Schools sometimes provide data that are unusable or fail to report requested data. Each table is accompanied by a summary of omitted data.

Out-of-Province/Territory Partnerships

Colleges and universities may establish program delivery partnerships that cross provincial or territorial boundaries. In 2007, the treatment of graduate data from program delivery partnerships that cross provincial or territorial boundaries was amended so that graduate results would be recorded in the student's home province or territory. Admission and enrolment data continue to be recorded according to the program delivery responsibility of each partner. The handling of admission and enrolment data did not change. Historical graduate data have been adjusted accordingly. Please see "Survey Methodology" for additional details.

Out-of-province/territory baccalaureate collaborative partnerships as of 2015–2016 include: Aurora College, N.W.T., partnered with the University of Victoria, B.C.; Nunavut Arctic College, Nunavut, partnered with Dalhousie University, N.S.; and Humber College, Ont., partnered with the University of New Brunswick, N.B.

Survey Response

2011–2012: The survey was issued to all 135 schools offering nursing programs; 111 schools completed the survey; 4 Ontario colleges (4 ETP baccalaureate programs) and 1 Quebec university (1 ETP baccalaureate programs, 1 post-RN baccalaureate program, and 1 master's program) and 17 Quebec CEGEPs/colleges (17 ETP diploma programs), 2 British Columbia colleges (2 ETP baccalaureate programs, 1 post-RN baccalaureate program) did not complete the survey. ***The overall survey response rate was 82%;*** the CASN member response rate was 93%. On average, 74.9% of schools responded to the faculty questions.

2012–2013: The survey was issued to the 135 schools of nursing offering programs; 114 schools completed the survey; ***The overall survey response rate was 84.4%;*** the CASN member response rate was 91.4%. On average, 72.3% of schools responded to the faculty questions.

2013–2014: The survey was issued to the 134 schools of nursing offering programs; 114 schools completed the survey; ***The overall survey response rate was 85.1%;*** the CASN member response rate was 94.6%. On average, 72.0% of schools responded to the faculty questions.

2014–2015: The survey was issued to the 137 schools of nursing offering programs; 115 schools completed the survey; ***The overall survey response rate was 84.6%;*** the CASN

member response rate was 94.6%. See the tables starting on page 22 for more detailed information about omitted or unusable data. On average, 79.2% of schools responded to the faculty questions.

2015–2016: The survey was issued to the 137 schools of nursing offering programs; 117 schools completed the survey; ***The overall survey response rate was 85.4%***; the CASN member response rate was 97.9%. See the tables starting on page 22 for more detailed information about omitted or unusable data. On average, 80.6% of schools responded to the faculty questions.

Privacy and Confidentiality

In accordance CASN’s privacy policies, small cell entries between 1 and 4 are not reported. Some cell values of 5 or greater have also been suppressed to protect confidentiality.

APPENDIX

National Student and Faculty Survey of Canadian Schools of Nursing 2015–2016: Survey Methodology

Registered nurses (RNs) represented 70.9% of the total regulated nurse workforce in 2016.^v

General Methodology

Background

CNA began administering an annual survey on nursing students and faculty in 1963. In 2001, a new survey and methodology were developed for CNA by well-known statistician Eva Ryten. The Canadian Association of Schools of Nursing (CASN) led the development of the faculty questions that same year. CASN member schools tested the new survey prior to its initial distribution in 2002. Throughout the partnership, CNA and CASN have introduced changes to the survey to reflect changes in program delivery and to increase data related to faculty. All changes are tested at selected schools of nursing prior to adoption. CASN took over full administration of the survey in 2013.

In the mid-1990s, provinces and territories moved to phase out community college diploma programs and convert all new nurse supply education programs to undergraduate degree programs. Conversion to degree programs is complete in all provinces and territories except for Quebec. In 2010, a final intake of diploma students took place at two schools in Manitoba. The Northwest Territories and Nunavut converted to degree programs in 2010. Quebec continues to provide diploma programs while supporting the development of baccalaureate partnerships between CEGEPs/colleges and universities. The Yukon has no entry-level educational programs.

The following table shows the different stages of the transition from diploma entry-level to baccalaureate entry-level education.

Entry-to-Practice Education Requirements for Registered Nurses

Jurisdiction	Target Year and Status
Atlantic provinces (Prince Edward Island, Newfoundland and Labrador, New Brunswick, Nova Scotia)	1998 completed
Saskatchewan	2000 completed
Ontario	2005 completed
British Columbia	2006 completed
Alberta	2009 completed
Northwest Territories and Nunavut	2010 completed
Manitoba	2013 completed
Quebec	Quebec continues to offer diploma programs while supporting the development of baccalaureate partnerships between <i>Collèges d'enseignement général et professionnel</i> (CEGEPs) and universities.
Yukon	The Yukon has no entry-level educational programs.

The conversion from diploma to degree programs brought in its wake many statistical complications. The mechanism adopted to convert from diploma to degree programs was the introduction of collaborative degree programs. “Collaborative” refers to a relationship of cooperation between a university and one or more college-level institutions. The extent and type of collaboration models existing between a university and its collaborating partner or partners vary greatly. For example, the university may be responsible only for ensuring that the curriculum meets university degree standards, and the college may deliver the entire curriculum on its sites. Alternatively, the university may be heavily involved not only in approving academic standards but also in delivering sizable amounts of the curriculum on its campuses.

A data record linking process permits admission and enrolment data of programs delivered under a collaborative model to be linked to the graduate program data of the degree-granting partner. This approach allows for the statistical tracking of nursing students by qualification earned from the point of admission, by each year of enrolment, through to graduation. It also accommodates recent changes whereby some colleges now award baccalaureate degrees or have changed their institution type from college to university. Historical results have not been affected by these changes.

Data Collection

The survey requests information on the following:

- **Program inventory** covers all nursing programs leading to initial licensure (e.g., diploma, diploma exit, baccalaureate, collaborative baccalaureate) as well as formal programs furthering an RN’s education (e.g., post-RN, master’s, doctorate, nurse practitioner); includes distance education programs, multiple language offerings and multiple partnership arrangements. Collection period: academic year.
- **Graduates** by qualification earned, graduates by gender for each program listed in the program inventory, by partner, by site, where available. Collection period: calendar year.
- **Faculty demographics** details on faculty responsible for the delivery of programs listed in the program inventory, by gender, contract type, rank and status; these data include components such as highest academic credential, age cohorts, faculty on leave, average age of retirement, attrition other than retirement, and additional information on classroom ratios. Collection period: calendar year.

Admission and enrolment data are collected for the previous academic year to ensure that fall, winter and summer intake data are gathered. Graduate data are collected for the calendar year to align with annual licensing examination practices and health human resources planning. Admission and enrolment data are counted only after the school’s allowed withdrawal date.

The data are completed by the appropriate designate at each school, and are reviewed and approved by the dean, director, program head or equivalent. On receipt, the data are reviewed by CASN to ensure that all programs, sites, partners and data elements have been included. Comparisons are made to program inventories from previous years as well as program data listed on each school website to ensure that data are representative of all programs offered by the school.

Disparities are resolved by the CASN program lead and the faculty member(s) responsible for the data compiled. The dean, director, program head or equivalent validates the data’s accuracy and completeness, and approves the use of the data to prepare reports and to support research and policy decisions affecting the future supply of nurses in Canada.

When data are not reported, the omitted data are sorted by data type and captured in one of two categories: (1) not available, or (2) not appropriate or applicable. Omitted data are identified in the reports.

In 2009, an online version of the survey was made available to CASN members. In 2015–2016, the online survey was available to all schools.

Data Organization

The data derived from the survey accommodate the increasing variety and complexity of nursing education models in Canada, including NP education models. The data are organized to allow for statistical trends to be tracked at provincial/territorial and national levels by qualification earned.

Another component of data organization accommodates the increasing variety of NP programs. NP programs may be combined with or integrated into master's degree programs, and schools may report separate data for these integrated programs. In these instances, data are recorded under the NP program. If the school is unable to provide the data separately (e.g., some integrated programs are reported such that all admission, enrolment and/or graduate data are included in the master's program), then all the data are included under the master's program.

Links are established between partners offering collaborative baccalaureate programs such that admission, enrolment and graduate data records mirror the delivery of each partner. A baccalaureate program is attributed to each partner offering a part of the baccalaureate program. This approach allows for the statistical tracking of nursing students by qualification earned from the point of admission, by each year of enrolment, at each partner site through to graduation. It also accommodates recent changes whereby some colleges now award baccalaureate degrees or have changed their institution type from college to university. Historical results have not been affected by these changes.

Colleges and universities may establish program delivery partnerships that cross provincial or territorial boundaries. In 2007, the treatment of graduate data from program delivery partnerships that cross provincial or territorial boundaries was amended so that graduate results would be recorded in the student's home province or territory. Admission and enrolment data continue to be recorded according to the program delivery responsibility of each partner. The handling of admission and enrolment data did not change. Historical graduate data have been adjusted accordingly. Please see "Survey Methodology" for additional details.

Tables

The survey data are summarized in 19 tables for distribution to schools of nursing and interested parties (e.g., CASN member schools, researchers, government departments). Each table contains important notes covering data scope, updates to previous years' data, omissions and acknowledgments.

It is important to review the program names included in each of the program categories listed in the various tables. Equally important is an understanding of the approach taken to collaborative baccalaureate programs, data pertaining to NP programs and partnerships outside provincial or territorial boundaries. See the section "Background," above, for information on this point as well as "Data Organization." A review of the definitions used in the survey, in the next section, is also recommended.

Data Confidentiality and Privacy

As part of the 2015–2016 survey submission procedures, each school completed a confidentiality and approval release form authorizing CASN to release the data for purposes of research, policy-making, advocacy, etc.

CASN staff adheres to CASN’s privacy policy, available on the CASN website.

Definitions Used in the Survey

Advanced Entrants (counted as of the school’s allowed withdrawal date)

Students previously enrolled in a non-nursing program (e.g., bachelor of arts, physiotherapy, and bachelor of science) who transfer to an RN education program. These students have already completed some of the program’s required courses. As a result, they may be approved to join an existing student cohort in Year 2 or Year 3, and so on. Data reported in this selection are included in the calculation of admissions.

Advanced entrants include:

- students previously enrolled in school X in a non-nursing program who transfer to an RN education program in school X;
- students previously enrolled in school Y in a non-nursing program who transfer to an RN education program at school X; and
- students with a degree from a non-nursing program who enter an RN education program.

Note: Advanced entrants differ from first-time students. See the definition for “first-time students.”

Baccalaureate Program Collaborative Delivery

A baccalaureate program offered in partnership between a university and another institution. Program partners may also belong to a consortium.

Baccalaureate Program University Delivery

A baccalaureate program offered solely by a university; no partners are involved.

Campus Site

The school site (campus) where a program is offered.

Continuing Students (counted as of the school’s allowed withdrawal date)

Continuing students include:

- full-time students who progress to the next year of study without interruption, remaining with the same student cohort from one year of study to the next;
- part-time students who require more than one academic year to complete all required courses; and
- students who fail a course in a particular year of an RN education program but are permitted to move to Year 2 (policy may vary from one school to another).

Employment Status

A description of the employment status of faculty members. Includes tenured/tenure-track (permanent), non-tenured (non-permanent), full-time and part-time status.

Enrolment (counted as of the school's allowed withdrawal date)

The number of students enrolled in each year of study.

Enrolment Status

The type of student enrolled in a given program. Student enrolment status options are

- first time;
- continuing;
- advanced entrant;
- repeater;
- returnee leave of absence;
- transfer-in internal; and
- transfer-in external.

Faculty Categories

The categories (i.e., faculty titles) provided may not apply to each school. Schools are encouraged to enter faculty titles in use at their school.

F1 Category

Within a university, these people are **tenured/tenurable** faculty who teach nursing courses. Within a college, these people are **permanent full-time** or **permanent part-time** faculty who teach nursing courses.

F2 Category

Within a university, these people are **non-tenurable** faculty fulfilling time-limited **contracts of one full academic year or longer** who teach nursing courses. Within a college, these people are **contract/non-permanent faculty** fulfilling time-limited **contracts of one full academic year or longer** who teach nursing courses.

F3 Category

Within a university, these people are **non-tenurable** faculty fulfilling time-limited **contracts of less than one full academic year** who teach nursing courses. Within a college, these people are **contract/non-permanent faculty** fulfilling time-limited **contracts of less than one full academic year** who teach nursing courses.

First-Time Students (counted as of the school's allowed withdrawal date)

New entrants to Year 1 of an RN education program. First-time students are found only in Year 1 data. Nursing students who are in Year 2 for the first time are not considered first-time students. Data reported in this selection are included in the calculation of admissions.

Note: First-time students differ from advanced entrants. See the definition of advanced entrants.

Intake

The number of times in an academic year when students enter programs. Sometimes *intake* is confused with the number of students admitted.

Program Category

Data are recorded in the database according to the following program categories: baccalaureate programs-university delivery, baccalaureate program-collaborative delivery,

post-RN, master's, doctoral, nurse practitioner. Each program category may contain multiple programs.

Example: Program category *post-RN*: the school may offer a post-RN program on-site as well as a post-RN program via distance. Both programs are listed under program category post-RN.

Program Duration

The expected number of years/semesters required to complete the entire program based on full-time program delivery.

Qualification

The name of the credential awarded upon successful completion of a program (e.g., BN, BScN, MN).

Repeater Students (counted as of the school's allowed withdrawal date)

Students who must repeat an entire year of study because they failed to meet their RN education program requirements in a given year (policy may vary from one school to another). However, students who are allowed to move on to the next year of the program while at the same time repeating a course from a previous year of study are not to be included in this enrolment status option. See "continuing students."

Returnee Leave of Absence (LOA) Students (counted as of the school's allowed withdrawal date)

Students who return to an RN education program following a school-sanctioned leave of absence (LOA) (e.g., maternity leave). The school policy regarding the amount of time a student may be absent dictates which students are included in this enrolment status option.

Roll-up Results

The combined total of program results where the programs belong to the same program category.

Transfer-In Internal Students (counted as of the school's allowed withdrawal date)

These students continue in an RN education program without interruption but transfer to a different campus of the same school to do so. These students have previously been counted in the program data of the original campus. This new enrolment status option permits schools with multiple campuses to better track the flow of nursing students across their various campus locations.

Note: In past years, some schools reported these students as "continuing students". If possible, please specify transfer-in internal students.

Transfer-In External Students (counted as of the school's allowed withdrawal date)

Students who started an RN education program at one school and transferred to a second school to continue their studies while remaining in the same program category. These students have previously been included in the program data of the original school. This new enrolment status option allows the receiving school to differentiate between transfers who are nursing students from other institutions and non-nursing students (see related information under "advanced entrants").

Note: In past years, some schools reported these students as "continuing students," while others chose "first time" in Year 2, etc. Transfer-in external students should be identified where possible.
