VIRTUAL SIMULATION GAME (VSG) DESIGN AND FACILITATION

2-DAY WORKSHOP

Topics:

- ✚ Virtual Simulation Game Design
- ✚ Decision Point Mapping
- ✚ Script Writing
- ✚ Filming
- ✚ Game Assembly
- ✚ Resources
- ✚ Research

WORKSHOP DESCRIPTION

The authors of this workshop have developed a cost-effective virtual simulation game (VSG) toolkit for nurse education to create educational virtual simulation games. This interactive 2-day faculty development workshop will guide participants through the process of developing and filming their own VSG from pre-existing simulation scenarios using the CAN-Sim VSG toolkit. The workshop learning outcomes include:

1. Understand the process of creating virtual simulation games from existing scenarios.
2. Identify the various applications for IPE virtual simulation games.
3. Experience the process of writing a decision-making script.
4. Direct and film a virtual simulation game using a GoPro technology.
5. Describe effective practices for developing an IPE virtual simulation game.

DATES

Dates: October 18-19, 2019

Location: University of Ottawa, Lees Campus
