

SUBJECT: Be READY for Distance Learning with ALEX

Sim Center closed? Not a problem with ALEX.

ALEX has just become the world's first multi-modal patient simulator, with seamless support for both manikin- and screen-based simulation.

Your learners can now run any ALEX scenario on virtual ALEX in the browser, from anywhere, anytime..

Virtual ALEX works just like the ALEX manikin: learners can see the patient, listen to vital sounds, check pulses and practice clinical interviewing.

[\[Be READY with ALEX\]](#)

Virtual ALEX is available on all ALEX simulators between now and July 31st, 2020. After July 31st Virtual ALEX is an exclusive feature to ALEX Pro.
