Peer-to-Peer Skills Development in Nursing

Enhance Learning Opportunities

Formalized learning together with peers is an effective and efficient way of learning or practicing key skills and procedures. At a time when resources are stretched and demands upon staff are increasing, Peer-to-Peer learning offers students the opportunity to take advantage of a valuable resource – each other.

A Guided Learning Experience

Peer-to-Peer (P2P) Skills Development in Nursing comes with ten standardized skills checklist scenarios and introductory e-learning for both faculty and students. Grounded in best practices from leading nursing textbooks, this comprehensive solution offers a formalized peer-led learning experience that can help students build competence and confidence in performing clinical skills.

Scenarios Offer Students the Ability to:

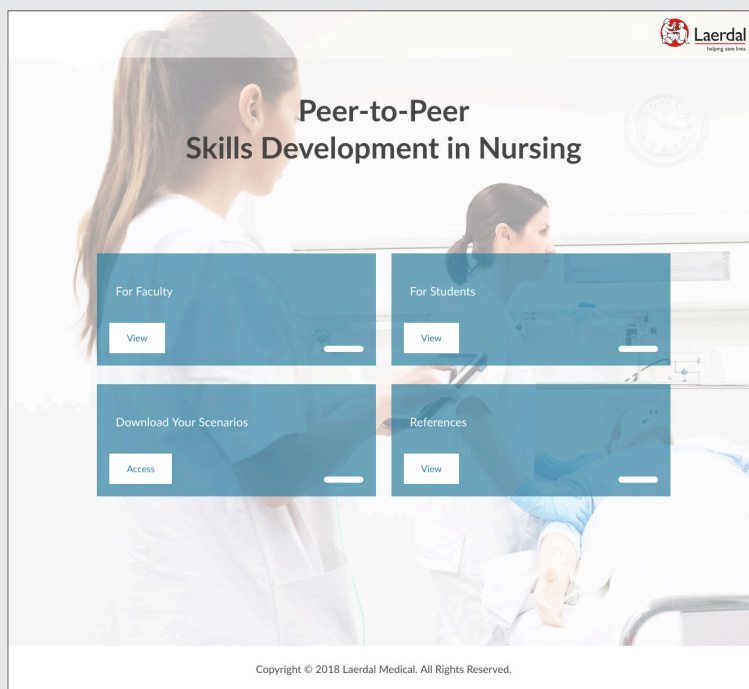

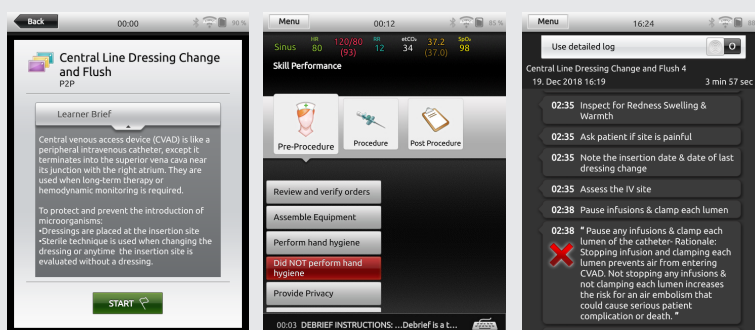

- ✓ Use electronic step-by-step skills checklists
- ✓ Facilitate peer learning with detailed guides
- ✓ Improve through comprehensive feedback and rationales

Scenario Topics Include:

1. Blood Transfusion
2. Central Line Dressing Change and Flush
3. Head-to-Toe Assessment
4. Indwelling Urinary Catheterization
5. Medication Administration - Injections
6. Medication Administration - Intravenous
7. Medication Administration - Oral
8. Nasogastric Tube Insertion
9. Sterile Dressing Change
10. Tracheostomy Care and Suctioning

E-Learning Modules Offer:

- ✓ Introduction to Peer-to-Peer Skills Development in Nursing
- ✓ Demonstrations of how to use Peer-to-Peer Skills Development in Nursing
- ✓ Access to scenario files including printable downloads of each scenario checklist
