

Educators benefit from

- Seamless curriculum integration
- Formative and summative assessment options
- Simple assessment scheduling
- Automated assessment generation, marking and feedback
- Student engagement and performance monitoring
- Powerful reporting and data export facilities

Essential Skills

Injectable Medicines Therapy

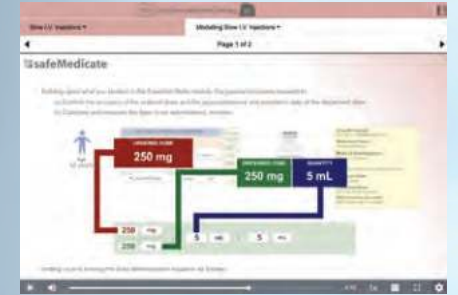

Your first steps to dosage calculation competence

Designed to develop and assess the competencies required for building a solid foundation for safe medication dosage calculations.

Advancing Your Practice

Complex problem solving and calculations associated with injectable medicines therapy such as slow IV injections, intermittent and continuous infusions.

Bodyweight Based & Body Surface Area Calculations

Word Problem Skills

Building Upon The Basics

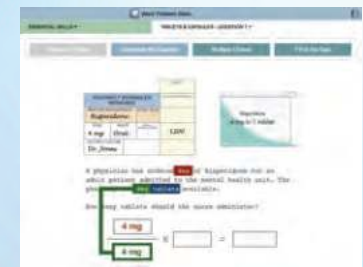

Designed to develop and assess the competencies required for safe medication practice for pediatrics and adults.

Complex problem solving and calculations associated with bodyweight and body surface area dosage problems.

Learn how to solve word based dosage calculation problems

Prepares students for NCLEX while teaching competency in all aspects of medication dosage calculation – going beyond NCLEX to prepare new nurses for the clinical environment.

Students benefit from

- Online self-paced learning
- Engaging interactive content
- Structured, supportive learning
- Authentic dosage problems
- Diagnostic practice assessments
- Comprehensive feedback
- Personal record of achievement

My students really love the program and my first-time pass rate on our Medication Administration Competency Assessment was the highest ever.”
 Dr. Sharon T. Johnson,
 University of Texas at Arlington

safeMedicate for Healthcare

A Complete Cost Effective Solution
To Support:

- Pre-employment testing
- Periodic competence audit
- Pro-active risk management
- Targeted training and development
- Patient safety improvements
- Periodic revalidation / relicensure

Improving Quality & Patient Safety

"It is estimated that 75% of novice nurses
commit medication errors."

(Saintsing, D., Gibson, L. & Pennington, A. (2011). The novice nurse and clinical decision-making: how to avoid errors. Journal of Nursing Management, 19,354-359.)

Our highly interactive, visual and self-paced learning and assessment environments have been designed by experienced nurse educators and clinical pharmacists informed by over 30 years of international translational research.

It's All About Safety In Numbers
