Modular Skills Trainer

Improve learning in any setting

The growing demand for independent learning modalities that cover essential skills make the Modular Skills Trainer an optimal choice. Learners can practice to improve or validate their skills competency either in the classroom or remotely. Further enhance skills practice by combining the Modular Skills Trainer with SimCapture Enterprise's latest cloud-based technology for measurable learner-driven competence building from anywhere.

Interchangeable accessories for multiple training opportunities

Featuring 16 different clinical skills to train, the Modular Skills Trainer is designed to fit the needs of today's nursing schools, providing learners with the clinical skills they'll be expected to perform on real patients. The interchangeable accessories are in different skin tones representing diversity in patients. Intuitive configurations ensure ease-of-use and storage for after training.

The Modular Skills Trainer allows users to practice a wide array of patient care skills including:

- Nasogastric Tube Insertion
- Wound Care
- Tracheostomy Care
- Central Line Dressing Change
- Ostomy Care
- Urinary Catheterization & Enema
- Injections
- Intravenous Catheterization & Phlebotomy
- Suppositories (rectal & vaginal)
- Perineal Care
- Oxygen Therapy
- Nasal Swab
- G-tube Care

Portable and durable for repeated use

Constructed from lightweight recycled materials, the Modular Skills Trainer offers improved longevity. The trainer and included accessories are easy-to-clean ensuring endurance through many sessions.

Build skills competence more efficiently with SimCapture Enterprise

Deliver real-world skills training with measured results by combining Modular Skills Trainer with SimCapture Enterprise. SimCapture Enterprise offers innovative, cloud-based tools designed for peer-to-peer or individual skills practice including video self-recording, customizable content and peer-to-peer evaluations.
