(Supplies Not Included)

TOUCHPOINT MEDICAL

## medDispense® Unit Medication Dispensing System

The medDispense® unit is a versatile workstation with a 15" touchscreen and 25-drawer base unit. Each drawer is configurable to store up to six different floor stock medications or one narcotic per drawer. Underneath is 1.5 cubic feet of bulk storage space.

• 56" H × 21.25" W × 22.87" D | 233lb.

### INCLUDES:

- Barcode scanner
- Demo Dose® sample pack of medications
- Demo Dose® education software
- Product library

### OPTIONAL STORAGE CABINET:

The optional storage cabinet provides 5.6 cubic feet of shelved bulk space.

• 37" H × 21.25" W × 20.12" D | 157lb.

### DEMO DOSE® SAMPLE PACK:

This sample pack includes a variety of Demo Dose® Simulated Medications and Simulated IV Fluids to use with your cabinets when teaching proper medication management and administration. This bundle will allow for instruction using many different simulation scenarios.

TOUCHPOINT MEDICAL

## AccessRx Secure™ Medication Delivery Workstation

AccessRx Secure™ is a wireless mobile workstation typically used to deliver medications to a patient's bedside after being loaded from an automated dispensing machine. With three available bin configurations, this flexible workstation is ideal for medication management and administration scenarios.

- Ergonomically designed for ease of mobility and for use while seated
- Computer: Dell® 3050 Mini PC, I5, 8GBR, 500GB HDD, Windows® 10, IW
- Load software onto the local hard drive or access programs online
- Bar code scanner: 1D Tethered - Symbol LS2208
- Lock-Alert software allows for assignment of users, electronic labeling of bins, and secure locking of drawers
- Work surface width: 21.5"
- Work surface height adjusts from 34"–46" via electronic lift
- Rechargeable DC battery lasts up to eight hours on a single charge

\*SimCartRx Elite can function without SimEMR®.

KBPORT™

**Wireless Barcode Scanner**

KBPort™ software allows for access to patient records as well as medication administration to simulated patients by scanning a barcode. The wireless functionality adds versatility.

- Bluetooth® wireless technology
- Omni-directional barcode reader
- Long battery life

**04-69-4278**

KBPORT™

**Wired Barcode Scanner**

KBPort™ software allows for access to patient records as well as medication administration to simulated patients by scanning a barcode.

- Reliable data collection
- Omni-directional barcode reader
- Ability to read poor quality and mobile barcodes

**06-69-3123**

KBPORT™

**Barcode Printer Package**

Print your own barcodes or scan and decode barcodes as well as modify and transmit barcode data to KBPort™ software.

- Barcode printer
- Barcode printer labels
- USB cable

**06-69-1600**

KBPORT™

**Wristband Printer**

Print patient wristbands to scan and connect with KbPort™ software. Including barcode scanning as a part of healthcare education helps to simulate the process of medication administration when interacting with a patient.

- LCD Display
- Ethernet and USB 2.0 connectivity
- Maximum label width: 2.36"

**04-07-2250**

KBPORT™

**Barcode Printer Labels**

Barcode label refills are compatible with barcode printer (06-69-1600).

- Permanent adhesive
- Perforated

**06-69-7059**

KBPORT™

**Wristband Printer Labels**

Label refills are compatible with wristband printer (04-07-2250).

- Direct thermal polypropylene wristband
- Permanent acrylic adhesive paper tab
- Tamper-evident slits
- Each label measures 11" L x 1" W

**06-69-7001**

KBPORT™

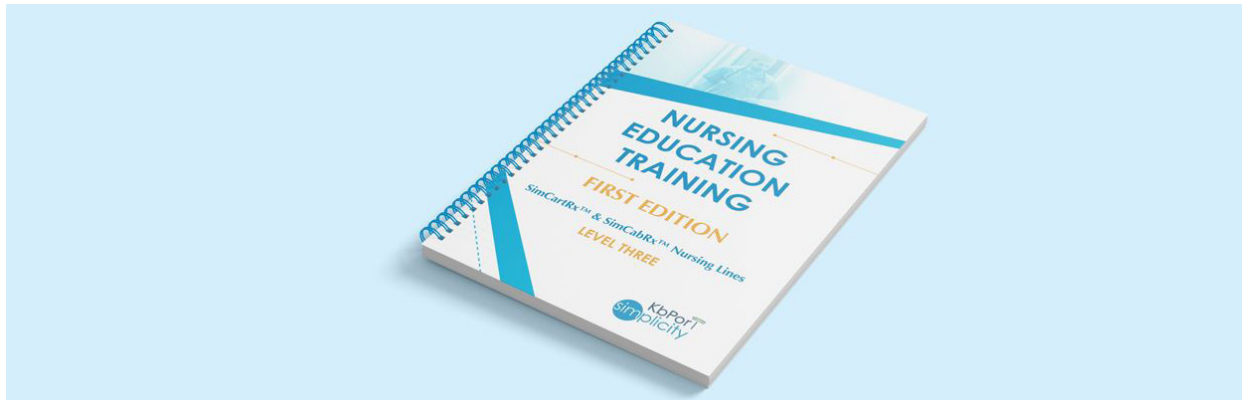

**SimCartRx™ MedCase Cassette**

This is a cost-effective addition to SimCartRx™ Standard and SimCartRx™ Lite for storage of simulated medication for individual students.

- Secure med storage for individual students
- (6) drawers, bin, keypad
- SimCartRx™ Standard and SimCartRx™ Lite only

**06-69-3126**

All accessories are compatible with SimCabRx™ and SimCartRx™ items.

ONE COPY INCLUDED FREE WITH EACH NURSING MEDICATION DISPENSING DEVICE

## Nursing Education Training

### SIMULATE • EDUCATE • IMPROVE

The growing world of nursing is as exciting as it is interesting! Your learners have embarked on a journey to become a part of one of the fastest-growing and most in-need healthcare fields. Nurses play a huge role in patient care, with more and more budding roles and responsibilities. Adding more obligations to an already challenging workload may seem daunting, but will lead to increased competence and improved patient care.

Some of these responsibilities include assessing and planning nursing care, pre- and post-operation care, monitoring and administering medication and IV infusions, and patient and relative emotional support. Working directly with patients and their families to provide medical attention, emotional support, and answer questions creates a need for more extensive hands-on training, which KbPort™ Nursing Education Training will walk you through.

As the roles of nurses continue to evolve, it becomes increasingly important for educational programs to further challenge learners and provide them with the hands-on practice necessary for their success. Nursing Education Training will help you instruct learners in gaining the skills and practice needed in order to fulfill future tasks as nurses through various teaching methods, including hands-on training and activities. Through these workbooks, learners are sure to become highly-skilled nurses, improving patient outcomes.

#### FEATURES:

- Innovative lesson plans to assist instructors in teaching future Nursing students
- Step-by-step instructor setup directions
- Step-by-step learner activities
- Rubrics
- Intuitive assignments

#### SPECIFICATIONS:

- Lesson plans are to be used with the KbPort™ SimCabRx/SimCartRx only and require either MedSkills™ license or SimEMR® software
- Curriculum requires MDS purchase
- Spiral bound; 8.5" × 11"

**06-98-1101-LVL1**

## Pharmacy Tech Lesson Plans

### **SIMULATE • EDUCATE • IMPROVE**

Pharmacy technology learners have embarked on a journey to become a part of one of the fastest growing health care fields. Pharmacy technicians are the backbone of the pharmaceutical field, with more and more budding roles and responsibilities. Adding more obligations to an already challenging workload may seem daunting, but will lead to increased competence and better patient care.

Some of these responsibilities include managing inventory, medication distribution, quality control, and patient education. Working directly with patients to provide medication information and answer questions creates a need for more extensive hands-on training, which KbPort™ Pharmacy Tech Lesson Plans will walk you through.

As the roles of pharmacy technicians continue to evolve, it becomes increasingly important for educational programs to further challenge learners and provide them with the hands-on practice necessary for their success. Pharmacy Tech Lesson Plans will help you instruct learners in gaining the skills and practice needed to fulfill future tasks as pharmacy technicians through various teaching methods, including hands-on training, and activities.

#### **FEATURES:**

- Works with KbPort™ hardware:
  - SimCabRx™ Pharmacy line
- Works with KbPort+ software:
  - MedsManager™
  - SimEMR® or MedSkills™
- Highly readable format
- Content written by a leading expert in the field

#### **WORKBOOK CONTAINS:**

- Lab introductions
- Instructor directions
- Pharmacy Tech competencies addressed
- Terms and definitions
- Learner objectives and instructions
- Safety precautions, notes, and lab tips
- Activities
- Evaluation rubrics
- Suggested references
