Virtual Vendor Showcase Presentations

Les présentations des fournisseurs seront offertes en anglais seulement

Company Name	Presentation Time (Time is logged as EDT)
Opening remarks	10:00 a.m. to 10:05 a.m.
Intelligent Video Solutions	10:05 a.m. to 10:35 a.m. Vendor Presentation #1
Break	10:35 am – 10:40 am
JoVE	10:40 a.m. to 11:10 a.m. Vendor Presentation #2
Break	11:10 am – 11:15 am
EdEHR	11:15 a.m. to 11:45 a.m. Vendor Presentation #3
Break	11:45 am -11:50 am
Synergy Gateway Verified	11:50 a.m. to 12:20 pm Vendor Presentation #4
Break (Lunch break)	12:20 p.m. to 12:50 p.m.
CAN-Sim	12:50 p.m. to 1:20 p.m. Vendor Presentation #5
Break	1:20 p.m. to 1:25 p.m.
Vigilance Santé	1:25 p.m. to 1:55 p.m. Vendor Presentation #6
Break	1:55 p.m. to 2:00 p.m.
Laerdal Medical	2:00 p.m. to 2:30 p.m. Vendor Presentation #7
Break	2:30 p.m. to 2:35 p.m.
Elsevier Health	2:35 p.m. to 3:05 p.m. Vendor Presentation #8
Break	3:05 p.m. to 3:10 p.m.
safeMedicate	3:10 p.m. to 3:40 p.m. Vendor Presentation #9
Break	3:40 p.m. to 3:45 p.m.
Educational Management Solutions	3:45 p.m. to 4:15 p.m. Vendor Presentation #10
Break	4:15 p.m. to 4:20 p.m.
Pocket Nurse Canada ULC	4:20 p.m. to 4:50 p.m. Vendor Presentation #11
Wrap up	4:50 p.m. to 5:00 p.m.

 INTELLIGENT VIDEO SOLUTIONS	<p>The Intelligent Video Solutions' VALT system for training and educating aspiring nurses is a powerful yet inexpensive solution that enables nursing education programs to achieve a dramatic increase in the efficacy of hands-on training. Students and Instructors can utilize video to improve, assess, and augment their skills especially during debrief. IVS can custom design a turnkey solution for any program.</p>
	<p>JoVE provides a comprehensive collection of video-based resources tailored to nursing education, bridging the gap between theoretical learning and practical application. JoVE allows you to supplement your existing nursing curriculum by providing videos that can be used anywhere in your LMS or in class. Nursing programs that use JoVE can improve accessibility and student outcomes by making complex topics easier for learners to understand. Join our session to learn how JoVE is making a difference in nursing programs across Canada! The following topics will be reviewed:</p> <ol style="list-style-type: none"> 1. Enhanced Learning Through Visual Engagement <ul style="list-style-type: none"> • High-quality animations to simplify medical and nursing concepts. • 3D visualizations offer a clear representation of anatomical structures, pharmacological processes, and nursing procedures. 2. Comprehensive Coverage of Key Nursing Topics <ul style="list-style-type: none"> • JoVE Core: Medical-Surgical Nursing – Essential patient care topics, including disease pathophysiology, medical-surgical management, and nursing interventions. • JoVE Core: Nursing Theory – Training on nursing concepts, health systems, documentation, infection prevention, ethics, and patient communication.

May 14, 2025

	<ul style="list-style-type: none">• JoVE Core: Anatomy & Physiology – Animations to help students visualize the human body’s structures and functions.• JoVE Core: Pharmacology – Breaks down complex drug mechanisms and treatments, including CNS pharmacology, pain management, and cardiovascular drugs, among others.• JoVE Clinical Skills – Step-by-step demonstrations of physical exams, emergency care, and nursing procedures. <p>3. Alignment with Real-World Nursing Practice</p> <ul style="list-style-type: none">• Demonstrations from top medical school institutions (e.g., Yale, Johns Hopkins, Tufts).• Nursing skills such as patient assessments, medication administration, and emergency care techniques.• Resources are available for students studying for NCLEX or the REx-PN. <p>4. Flexible and Scalable Learning Tool</p> <ul style="list-style-type: none">• Accessible online, allowing students to learn at their own pace.• Supports flipped classrooms, remote learning, and supplemental education.

As a Canadian nurse educator, are your learners gaining the skills they need to work confidently with electronic health records? Digital competency is now a core expectation—and Canada’s own **EdEHR** is designed to help meet that need.

EdEHR stands for exactly what it is: an Educational Electronic Health Record.

It isn’t a replica of any commercial EHR—and that’s intentional. Educators told us they want a space to teach how to think and document clearly—in any system. EdEHR is intuitive, educational, and flexible. It helps learners build the habits, judgment, and confidence they’ll carry into every clinical environment

EHRs are where nurses find what they need to know, document what they did, and communicate with the care team. It’s also where they advocate for safe, timely, quality care. In many systems, EHR use has drifted toward checkbox documentation, and the art of nursing—expressed through thoughtful narrative—is getting lost.

EdEHR is built for education, not billing. It encourages critical thinking, clinical judgment, and the storytelling that’s at the heart of nursing. Learners search for and enter data, write notes, and make decisions in simulated charts that unfold over time.

It’s easy to use, works seamlessly with your LMS, and gives educators full control over content. You can build your own case studies that layer evolving scenarios to match skill levels, reflect the diversity of Canada, and share across programs.

“It’s not an overstatement to say that this tool will transform the way we teach and learn in the School of Health Sciences.” —a BCIT educator

May 14, 2025

	<p>Synergy Gateway Verified (SGV) is a technology leader specializing in signature compliance solutions affordable for post-secondary education. By forging meaningful integrations and partnerships, SGV works with learners, PSIs, associations, and employers. Our innovative digital pathways streamline everything from student requirement document verification to licensing and accreditation, enabling seamless compliance practices from student to professional practice. SGV's Verified is a fully managed virtual compliance platform used by institutions and organizations to track and verify learner and instructor pre-placement requirements completely online. It's a simple solution for complex use cases, allowing learners, administrators, and placement partners to find efficiencies and reduce redundancies while maintaining student pre-placement clearances in real time. Verified supports the privacy, risk management and accreditation issues that PSIs currently face.</p>
	<p>The Canadian Alliance of Nurse Educators using Simulation (CAN-Sim) is a non-profit organization that supports excellence in simulation education and research through networking. With over 3500 members worldwide, CAN-Sim offers a variety of opportunities for collaboration, mentorship, innovation and scholarship. A CAN-Sim membership provides access to over 100 peer-reviewed clinical simulations and over 300 virtual simulations for nursing education. Many resources are available in both English and French. Our faculty development opportunities include clinical simulation and virtual simulation design workshops offered in-person, online or in hybrid formats, monthly webinars, and educational modules for clinical instructors and for simulation facilitators. We also host a highly engaged research interest group and a graduate student interest group, as well as offering research grants to support nurse-led simulation research. Our presentation will showcase the numerous resources available to support nurse educators in providing high quality simulation-based education and in conducting valuable simulation-based research.</p>

For nearly 30 years, **Vigilance Santé** has been a trusted Canadian partner in healthcare. Our bilingual software empowers over 75,000 healthcare professionals, including pharmacists, physicians, and nurses, who play a vital role in medication management and patient care. Paired with Canada's most extensive health information bank—featuring 1,600+ monographs, 115,000 commercial products, and 50,000+ medication images—our software provides instant, up-to-date drug information to support safe and effective care.

RxVigilance and RxPhotos offer essential tools for nurses, including drug reference and prescribing support, pill identification, comparative tables, side effect tracking, dressing selection, and calculation tools.

RxVigilance can also be used individually, thanks to a standalone web licence. Accessible from any browser, this version includes a mobile app for iOS and Android. The app offers on-the-go access with offline functionality, ensuring nurses and other healthcare professionals can rely on our tools anytime, anywhere.

We aim to raise awareness among nursing educators across Canada about RxVigilance and RxPhotos. This presentation will showcase how our solutions enhance medication safety and clinical decision-making while seamlessly integrating into nursing education and practice.

We will introduce Vigilance Santé, followed by an overview of RxPhotos and its role in drug identification. A live RxVigilance demonstration will highlight its practical applications, from essential tools for clinical nurses to advanced features for nurse practitioners, including pediatric dosing, equivalent dose calculations, and the profile editor. We are proud to provide reliable, Canadian-focused resources that help prepare future healthcare professionals for safe and effective practice.

Laerdal
helping save lives

Laerdal Medical is a world leader in healthcare education and resuscitation training that uses immersive technologies and data-centric insights to increase survival and improve healthcare quality. Improving the quality of care is part of our mission, to help save more lives. And we have established the goal to help save one million more lives. Every year. By 2030. However, we can't do this alone. This is a shared goal of the Laerdal Group. A group of companies that develops healthcare-related solutions and programs focused on a common mission to help save lives, together with our Partners. The Laerdal Group is composed of Laerdal Medical, Laerdal Global Health, Million Lives Fund, and Laerdal Foundation. Laerdal is a global company in 26 countries worldwide. For more information, visit www.laerdal.com.

Are you intrigued, worried, or unsure about how to integrate AI into your curriculum? Join Nurse Educator Kasey Brandt and Amy Levitt, Director of Sales for an engaging workshop where we explore the transformative potential of AI.

In this session, we will uncover the unique attributes of Elsevier's AI and discuss important considerations for fostering its use among faculty and students. Our AI supports safe practice and knowledge acquisition through responsible AI. All answers and information are referenced from evidence-based sources using Elsevier's trusted content.

Over the course of just 25 minutes, we will cover:

- **Best Practices and Policies:** Learn about academic policies that support student learning while integrating AI into their preparation and practice.
- **Collaborative Use of AI:** Discover how faculty and students can leverage the same AI tools to enhance teaching and learning in innovative ways.

	<ul style="list-style-type: none">• Effective Teaching Strategies: Explore practical examples of how AI can facilitate a more effective teaching experience and enrich student learning.• Time Management: Understand how AI can help refocus your instructional time, allowing you to engage students more deeply and enhance their understanding.• Sharpen Critical Thinking: Utilize AI to foster reflective practice and deeper inquiry, enhancing students' ability to analyze complex problems and make informed decisions in clinical settings. <p>Don't miss this opportunity to demystify AI and learn how to effectively incorporate it into your curriculum, ensuring a more enriched</p>
	<p>The safeMedicate Suite takes learners from the basics of mathematics to advanced calculations involving bodyweight/body surface and injectable medicines measurements to word problems used to practice for NCLEX. safeMedicate, our online educational application designed to empower learners as they develop and improve their drug dosage calculation and medication management skills has been used by Nursing programs in Canada for over 17 years. Introduced in 2024, safeHANDS assesses learner skills in the 20 areas of mathematics used by nurses and provides a roadmap targeting any areas of weakness. safeGUARD, our newest module, takes learners step-by-step through the six rights giving them context to understand and not just memorize the process used in medication administration to protect patient safety.</p> <p>With the safeMedicate Suite, students engage in the learning environment, practice their skills, and self-assess, while faculty administer assessments to monitor and evaluate progress. The program has not only proven to increase students' scores but also to reduce faculty remediation time.</p> <p>Based on over 30 years of research and evidence-based, safeMedicate was developed in the UK to support a Nationalized effort to reduce drug administration errors. safeMedicate dosage</p>

	<p>calculation assessments are still used there as the standard required of all those wishing to become nurses.</p> <p>Please visit www.safemedicate.net for more information or email sales@safemedicate.net.</p>
	<p>Education Management Solutions (EMS) is a leading provider of advanced training and onboarding solutions, designed to meet the rigorous demands of healthcare systems. With a focus on enhancing learning outcomes and maximizing return on investment, EMS delivers scalable, efficient, and cost-effective simulation and competency technologies. Our suite of solutions, including high-fidelity audio-video capture, real-time instructional tools, mobile training, progression tracking, and comprehensive integration capabilities, supports a wide range of needs. EMS is committed to driving excellence in training and ongoing professional education, offering responsive support and a dedication to helping our partners achieve superior results without overextending their budgets.”</p>
	<p>Nurse-owned and operated since 1992, Pocket Nurse® offers over 5,300 instructional products to enable simulation-based learning for a wide range of healthcare education programs.</p> <p>Featuring products carefully curated by our staff of Registered Nurses, Pocket Nurse® serves the classroom and simulation laboratory needs of instructors across many healthcare curricula. Pocket Nurse® educational products are well-suited to disciplines such as nursing education, EMS training, pharmacy tech, physical therapy, and other allied healthcare specialties. Product categories include Student Simulation Supply Kits, Diagnostic Equipment, Infection Control, Medical Furniture, Medication Management, Patient Care, Pharmacy and Laboratory Supplies (including Demo Dose® simulated medications), Respiratory, Surgical, Media, Educational Models, Simulators, Manikins and Task Trainers, Obstetrics and Pediatrics, Moulage, and Student Accessories. In addition, Pocket Nurse® provides cutting edge web-based simulation tools that are well suited to</p>
