

Training in Motion® Solutions

Now Available On:

Education Management Solutions' (EMS) Training in Motion® kit delivers comprehensive video capture-to-debrief solutions. Its on-the-move simulation management supports training in any environment.

Whether you need to easily connect to a larger enterprise system or seamlessly incorporate assessments, EMS Training in Motion® solutions provide you the flexibility and efficiency to deliver superior learning outcomes anywhere, anytime.

Lightning Fast Setup

Simple plug and play capability for major simulators makes setting up capture environments as simple as **plugging in and flipping a switch**.

AirPlay® and Video Conferencing Integration

Seamless integration with Airplay and third-party video conferencing tools **enables livestreaming** and the ability to **share with multiple locations**.

Video Management and Debrief

Advanced video management and debrief capabilities proficiently address learning gaps and **improve instructional outcomes** through improved efficiency.

Connectivity Monitoring

System Health allows for **easy monitoring of connectivity to cameras, vitals, and simulators** to ensure sessions run smoothly.

Multiple Feed Control

Configure and **simultaneously display cameras, vitals, and simulators**, with on-the-fly processing and set-up according to the need of the remote location.

"Our Training in Motion® solution reflects EMS' dedication to innovation and meeting the evolving needs of our partners. This highly capable, flexible, anytime-anywhere, simulation and debriefing solution meets the scalability and user-friendly needs of modern training demands. And now, with our expansion to the Android environment, Training in Motion® works with a wider array of hardware, clearly aligning with our vision: making simulation training more universally accessible."
