

Built for education and designed to mentor, guide, and elevate the next generation of healthcare professionals.

Empowering Future Healthcare Leaders Through Digital Competence

Designed specifically for education, edEHR offers a realistic yet idealized EHR experience that prepares students to confidently engage with any system they'll encounter in practice.

edEHR brings modern, forward-thinking EHR concepts into the classroom and wraps them in intuitive, education-centric controls. From real-time simulation to seamless integration, it delivers powerful tools that will build digital communication skills and elevate your student's learning experience

Idealized EHR

Built for education and practice. Mentors, guides, and elevates learners. Prepares tomorrow's health professionals.

Bridging Theory and Practice

Empowers students to experience why clinical theory helps build safe confident habits

Customizable Case Studies

Create, adapt, and share cases. Align scenarios with objectives. Support diverse clinical contexts.

SimTiming@ Technology

Control the flow of time. Start, pause, or fast-forward simulations. Deliver evolving immersive sessions.

Seamless Barcode Med Admin

Build patient-safety habits early. Scan medications accurately every time. Reinforce the "rights" of Med-Admin.

Free Mobile App

Barcode scanning on smartphones. Practice medication administration anywhere. No extra hardware or fees.

Cost-Effective & Easy to Use

Priced for real education budgets. Intuitive interface, minimal training. Deploy quickly with free support.

Seamless LMS Integration

Leverage your existing LMS. Sync class lists automatically. Centralize courses and permissions.

Free Pilot

Try EdEHR with your team and see how it helps students develop essential digital-communication skills—build consensus before committing resources.

Students: \$2.75 / active month
